

## **RESOLUTION ON INCENTIVIZING PREDATORS HARVESTING BY CMH MEMBERS**

To encourage the control of predators that cause significant damage to ungulate populations, the Presidium of the Club and the Trophy Committee have jointly decided:

to award an additional 0.5 points for each predator (wolf, bear, wolverine) legally harvested during hunts for mountain ungulates listed in the CMH ranking lists.

To implement this decision, provide for the inclusion of information on predators harvested during mountain ungulate hunts in the reports submitted by hunters on the CMH website.

Allow this information to be added to reports already approved and published on the website.

Proof that the predator was taken as an additional trophy during the mountain ungulate hunt may include field photographs, a copy of the hunting permit and a letter from the hunt organiser.
